2003 Federal Groundfish Management Measures that Affect Fishermen in Federal and State Waters<sup>1</sup> off California

## LIMITED ENTRY<sup>2</sup>

### TRAWL FISHERY

November - December

#### All Trawling Is Prohibited Within The Trawl Rockfish Conservation Area (RCA).

##### *Oregon border south to Mexico border*

For the remainder of the 2 month period the RCA is generally defined as the waters between **SHORE** and 200 fathoms (line modified to 150 fathoms in some areas to incorporate petrale sole fishing grounds).

The actual boundaries of the RCA are defined by a series of straight lines between "way points" for the 200 fathom and petrale management lines. The coordinates for the way points are available from the National Marine Fisheries Service (NMFS-SEA-03-17). **All trawl<sup>3</sup> types may be used seaward of the RCA. A vessel may have more than one type of trawl gear on board.** Vessels may transit the RCA with or without groundfish onboard provided the gear is stowed (see federal register for the definition of stowed).

## OTHER GROUNDFISH<sup>11</sup>

Not limited

NOTES: 1. California adopts federal groundfish regulations (California Code of Regulations, Title 14, Section 189, Commercial Groundfish Fishing)

2. A vessel with a limited entry permit may fish in the open access fishery using a gear other than the endorsement gear; however, the vessel will be held to limited entry limits even if the open access limit is larger. If the open access limit is smaller than the limited entry limit, the vessel cannot land more than the open access limit using non-endorsed gear; the remainder of the limited entry limit may be taken with the endorsed gear.

3. Large footrope (greater than 8" in diameter); Small footrope (8" or less in diameter).

4. The 2-month fishing period are: January-February; March-April; May-June; July-August; September-October; November-December.

5. State Nearshore Fishery Permit and/or Deeper Nearshore Species Fishery Permit Required.

6. Sablefish trip limits are in round weight equivalent. California allows dressed weight to be reported on landing receipts. If so reported, the receipts must be marked with the code for "dressed head off" (02) in the condition column. The equivalent round weight is computed by multiplying 1.6 times the dressed weight.

7. Groundfish species or species groups for which there is a trip limit, size limit, or OY (optimum yield) must be sorted prior to weighing and the weight reported separately on the Fish and Game receipt.

8. Landing receipts for groundfish must be maintained onboard the vessel during and for 15 days after the end of the cumulative limit period during which the landings occurred (63 FR 34606) (Fish & Game Code 8046.1).

9. Operating in areas with different trip limits. If a vessel takes and retains a groundfish species or species groups; a.) in an area where a more restrictive limit applies before fishing in an area where a more liberal limit or no limit applies; or b.) in an area where a more liberal or no limit applies and takes and retains, possesses or lands that species or species group in an area where a more restrictive limit applies; then the vessel is subject to the more restrictive limit for the period.

10. For a vessel in the "B" platoon, cumulative trip limit period begin on the 16th of the first month of a fishing period and end on the 15th of the first month of the following fishing period.

11. Other Groundfish: leopard and soupfin shark, spiny dogfish; big, California and longnose skate; ratfish; finescale codling; and grenadier.
